

OPENNESS OF MUNICIPALITIES 2021

The average openess of the municipalities is low - 25%

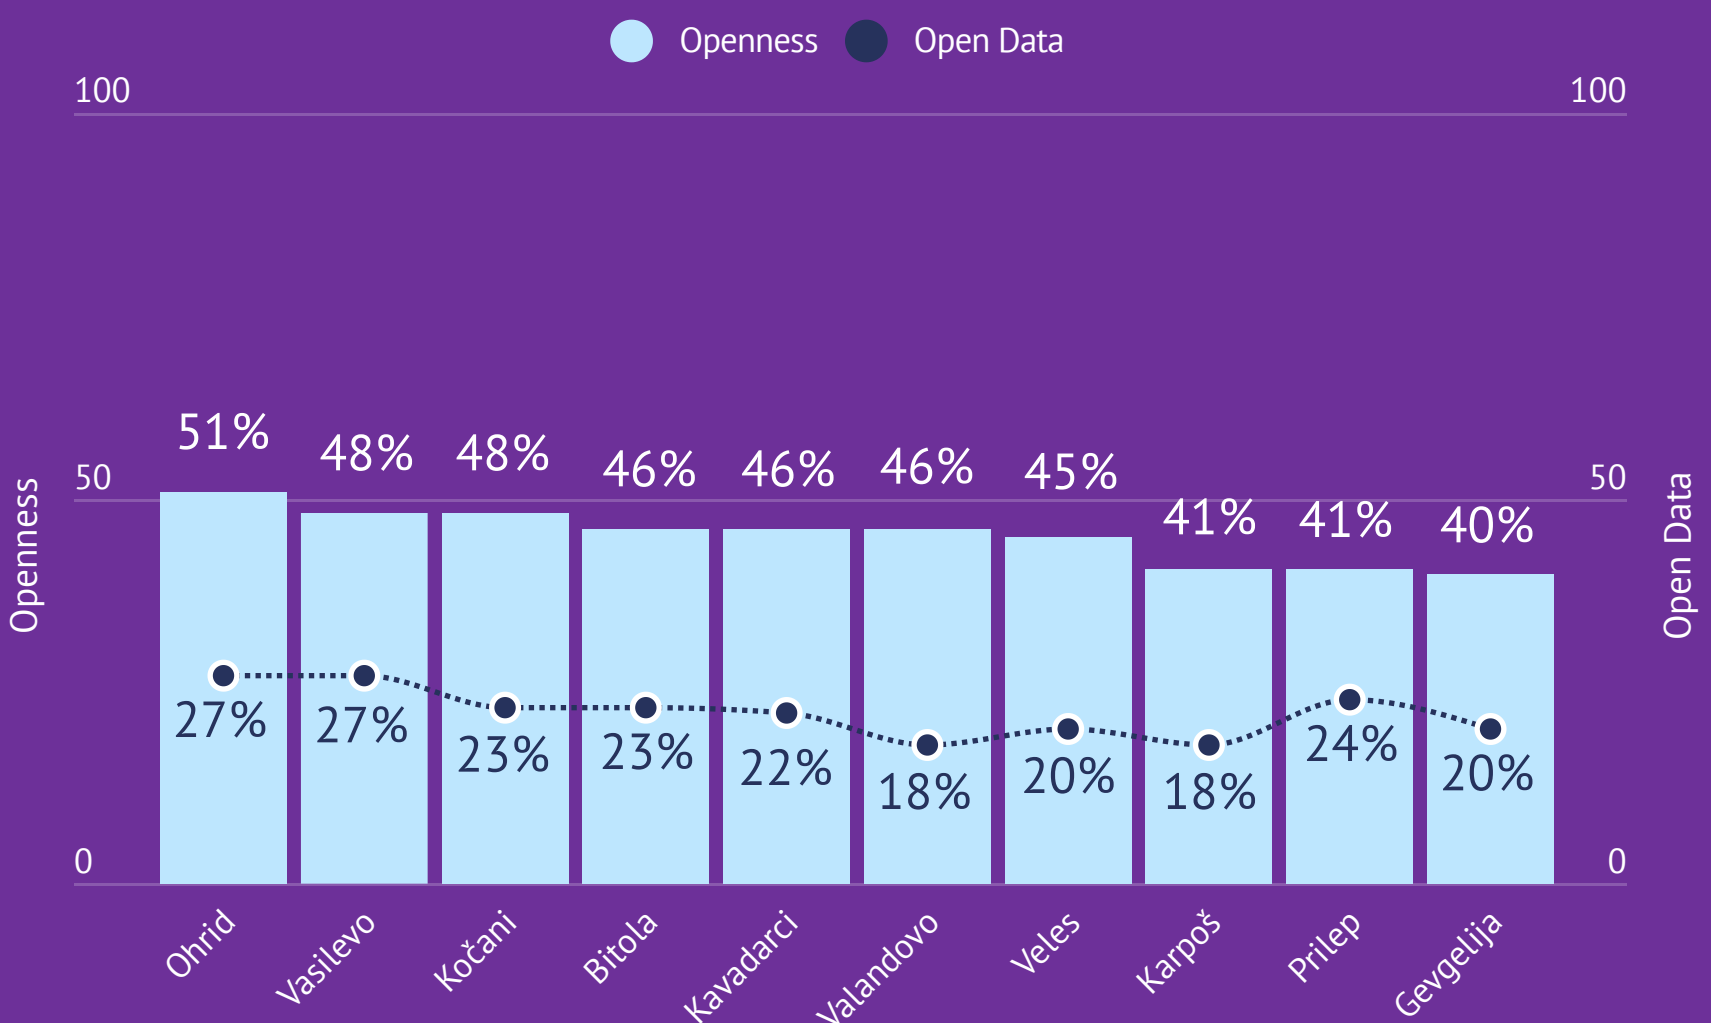

Openness consists of 4 main categories: awareness, integrity, accessibility and transparency. The measurement of the openess of the LSGU lasted from 1 June to 15 July 2021. The main source of data was the websites of the municipalities.

Average indicator fulfillment according to categories

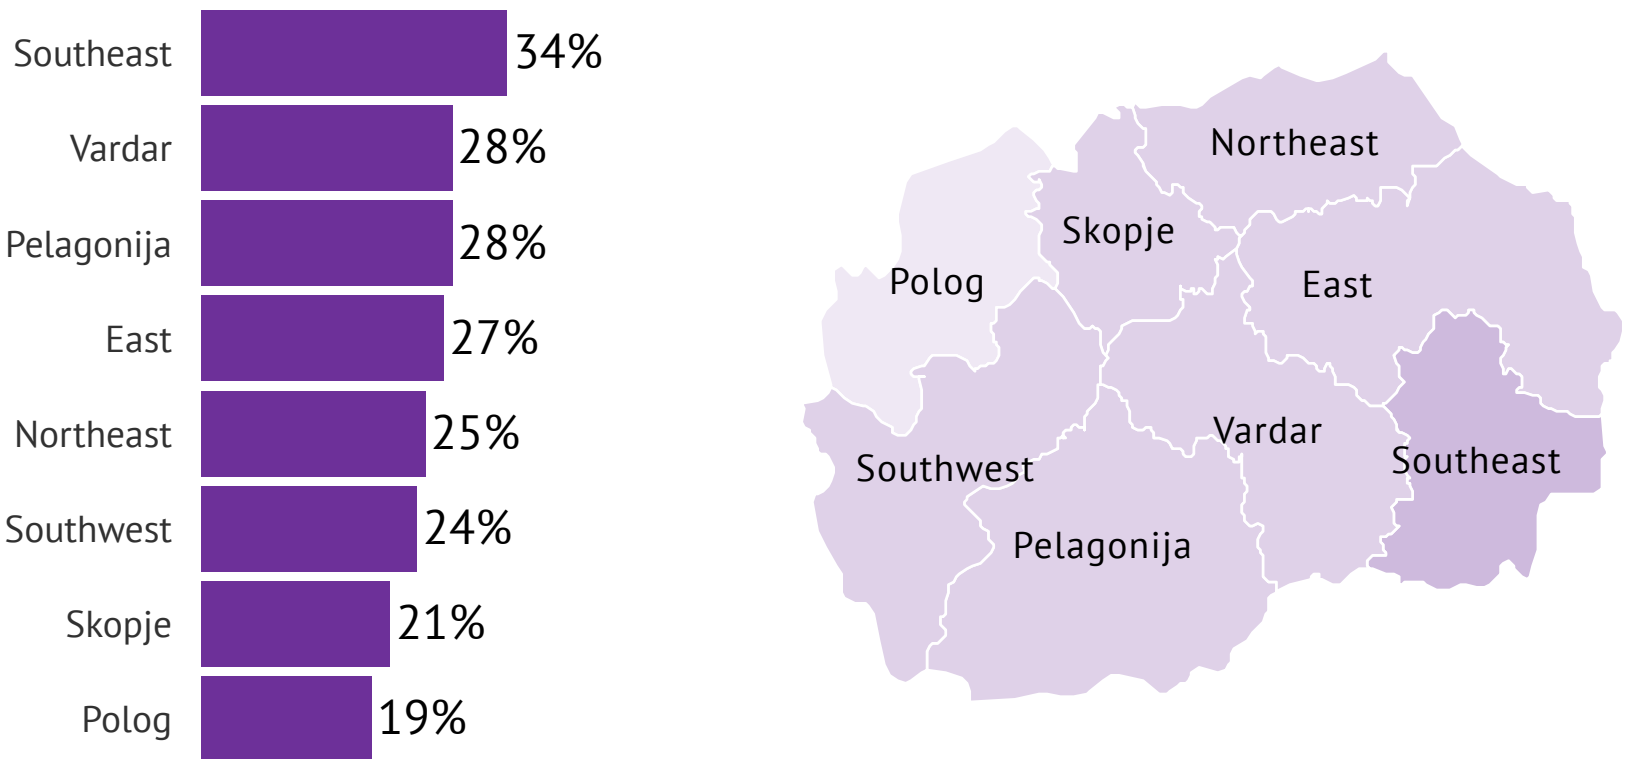

Half of the municipalities in RNM are assessed with an openess of less than 25% (average openess for 2021). The range is between 3% in Plasnica and 51% in Ohrid. Only 36 LSGUs (44%) answered the questionnaire.

Top 10 open LSGUs for 2021

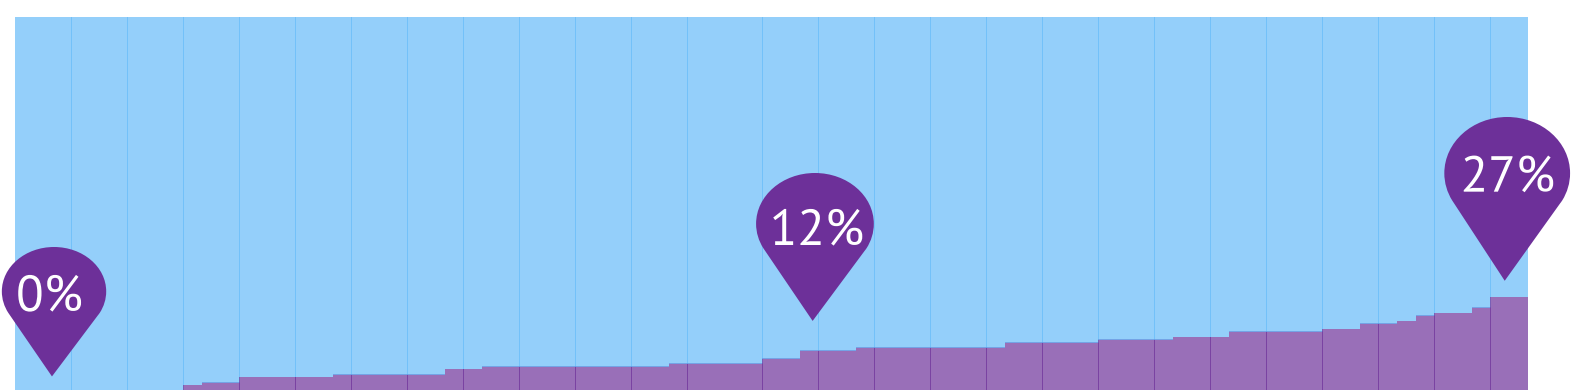

Regional overview of the openess of the LSGU

Although the average values are low, there are municipalities that continue to show solid results. Such examples are the municipalities of Ohrid, Vasilevo, Bitola, Kočani, and Kavadarci. The only municipality in the Skopje region that is in the top 10 is the municipality of Karpoš, with 41% openess.

LSGUs do not publish open data

With an average fulfillment rate of open data indicators of 12%, we can conclude that LSGUs rarely or never publish data in open format. The two municipalities with the highest score for open data are Ohrid and Vasilevo, with 27%.
