Webinar "Introduction to cyber-security and safety''

December 14, 2020 17:00 – 18:40

State surveillance? Cybercrime? Surveillance capitalism? Big topics, even bigger questions. How do you keep your data safe? Do you know what data is collected about you? Do you know what data is shared between platforms such as Facebook, Airbnb, Google? We've all been hacked in some way and we want you to learn how to:

1. safely use online social networks
2. securely configure your browser to block malicious scripts, cookies, trackers etc.
3. protect your privacy/anonymity
4. protect personal data you collect for your work
5. recognize threats posed by hackers, corporations, states

Join us, if you want to learn how to:

1. **protect** your privacy
2. **safely navigate** the digital world
3. **protect data**: your own, your family's, your organization's

About the Trainer

Goce Arsovski is the programme support officer in Metamorphosis Foundation. He is a psychologist, researcher and experienced trainer, working in the NGO sector for the past 7 years.

During this time, he has delivered dozens of trainings and webinars on topics such as utilizing open educational resources, social media campaigns for advocacy, cyber-security and safety, data analysis and data visualization, institutional openness and transparency, and many others.

Check www.hive-mind.community

In addition to the training please check www.hive-mind.community. Hive Mind is designed for you to train and learn to enhance your digital media literacy skills in a collaborative environment with your community of practice. Hand-picked and verified tools, our own custom built social media listening tool 'Social Media Radar" and self-paced online courses to name a few. All in a safe and secure environment.

The training is a TechSoup Europe initiative in cooperation with Metamorphosis Foundation and CA. Zasto Ne

METAMORPHOSIS
Foundation for Internet and Society

Metamorphosis Foundation works toward strengthening the awareness and capacity of citizens and civil society to assume their fullest possible role as activists for democracy, while supporting institutions to fulfil their democratic role in serving society, with particular emphasis on the use of information technology and knowledge-sharing.

CA Zasto ne - Why not is an organization that works on the creation of a safe, secure, healthy, active, efficient and accountable BiH society through increasing civic participation, influencing government accountability, use of new technology tools and promotion of socially engaged culture on the whole territory of BiH together with other interested groups, organizations, institutions and individuals.

TECHSOUP EUROPE supports civil society organizations across the continent to use the best technology for social change. It equips change makers with transformative technology products, knowledge, and services so they may benefit from technology and make social change. TechSoup teaches how to use technology for good and connects unlikely collaborators, such as social activists, hackers, designers, government, local authorities and business partners. TechSoup builds communities with whom it tries to generate innovative solutions to social challenges.

HIVE MIND — is a harbor for a community of practice. In today's digital world, our freedom of information is being challenged by sophisticated misinformation and disinformation tactics. We're here to assist you in the journey of digital transformation and to support these freedoms by building media literacy skills throughout civil society and in communities where people come together to form trust and social ties. www.hive-mind.community
