

CYBER-SECURITY AND SAFETY

call for participation in a project-based education program

January 11 – January 18, 2021 (15:00-16:30)

We invite you to be part of the project-based education program “**Cyber-security and safety**” which will be held in the period from January 11th up until January 18th, 2021. A total of 4 online meetings will be scheduled, each lasting approximately 90 minutes, begging at 15:00h.

In the duration of the programme, participants will be familiarized with the basics tenants of cyber-security and safety, privacy protection, surveillance, and cyber-security plans. Participants will learn to spot suspicious online activity (e.g. phishing mails), properly analyze their digital footprint, learn about the different levels and layers of cyber-security and privacy protection, and be able to characterize their weakest links in terms of security (including the security of their organization).

In the duration of the programme, with mentorship provided by the trainer, participants will be able to devise their own, **personal (or organizational)** security plan. **Selected plans will be subject to funding for their implementation.**

About the Trainer

Leading the programme is the program support officer in Metamorphosis Foundation, Goce Arsovski. He is a psychologist, researcher and experienced trainer, working in the NGO sector for the past 7 years. During this time, he has delivered dozens of trainings and webinars on topics such as utilizing open educational resources, social media campaigns for advocacy, cyber-security and safety, data analysis and data visualization, institutional openness and transparency, and many others.

Who is Invited to Apply

We especially encourage applicants from the civil society organizations, media, journalists and teaching staff.

Training Dates

The education program will be held online (via the Cisco WebEx platform).

The program includes four training sessions from 15:00-16:30 on the following dates:

- January 11
- January 13
- January 15
- January 18

The education program will also provide the participants with the opportunity for consultation and coaching by the trainer between sessions as well as individual and group work with the trainer.

Note: Working language of the webinar is English and all interested individuals from North Macedonia and Kosovo are invited to participate.

Application Form and Deadline

In addition to the training please check www.hive-mind.community. Hive Mind is designed for you to train and learn to enhance your digital media literacy skills in a collaborative environment with your community of practice. Hand-picked and verified tools, our own custom built social media listening tool 'Social Media Radar' and self-paced online courses to name a few. All in a safe and secure environment.

**The training is a TechSoup Europe initiative in cooperation with
Metamorphosis Foundation and CA Zasto Ne**

Metamorphosis Foundation works toward strengthening the awareness and capacity of citizens and civil society to assume their fullest possible role as activists for democracy, while supporting institutions to fulfil their democratic role in serving society with particular emphasis on the use of information technology and knowledge-sharing.

CA Zasto ne - Why not is an organization that works on the creation of a safe, secure, healthy, active, efficient and accountable BiH society through increasing civic participation, influencing government accountability, use of new technology tools and promotion of socially engaged culture on the whole territory of BiH together with other interested groups, organizations, institutions and individuals.

TECHSOUP EUROPE supports civil society organizations across the continent to use the best technology for social change. It equips change makers with transformative technology products, knowledge, and services so they may benefit from technology and make social change. TechSoup teaches how to use technology for good and connects unlikely collaborators, such as social activists, hackers, designers, government, local authorities and business partners. TechSoup builds communities with whom it tries to generate innovative solutions to social challenges.

HIVE MIND — is a harbor for a community of practice. In today's digital world, our freedom of information is being challenged by sophisticated misinformation and disinformation tactics. We're here to assist you in the journey of digital transformation and to support these freedoms by building media literacy skills throughout civil society and in communities where people come together to form trust and social ties www.hive-mind.community
